

Module	What it is used for	Typical access
Home Dashboard	Personal landing page with shortcuts, notices, summaries and recent activity.	All staff
E-Circulars	Opens the organisation's Microsoft communication/circulars workspace.	All staff
Attendance Check	Daily attendance actions such as check-in/check-out and attendance status.	All staff
Off-Premises Approvals	Review and action off-premises requests when assigned as an authorised reviewer.	Admin, regional manager/HR, department head
Excuse Duty	Submit excuse-duty requests and monitor their status.	All staff
Excuse Duty Review	Review and action assigned excuse-duty requests.	Authorised HR, managers and department heads
Leave Administration	Submit leave plans/requests, view balances and follow the leave approval process.	All staff; additional tabs by role
Loan Administration	Submit loan requests, track requests and perform role-based HOD, FD, accounts or payment activities.	All staff; additional tabs by role
MD Approval Hub	Executive review and approval of requests routed to the Managing Director.	Managing Director and admin
HR Records	Manage authorised HR records and memo/reference activities.	HR Records roles
Memo Console	Create, manage or process official memos and references.	Authorised secretariat/HR roles
Disbursement Confirmation	Confirm disbursement after the required loan/payment approvals.	Accounts/loan-office roles and admin
Reports & Trends	View authorised attendance, leave, loan and operational reports.	Authorised management/HR roles
Locations	Manage system locations and location-related configuration.	Admin and IT admin
Transport Management	Submit transport requests, manage approvals, drivers, licences and non-regional requisitions.	Role-dependent
Defaulters	Review authorised defaulter or compliance records.	Admin and department heads
Warnings Archive	View archived warnings and related records.	Authorised management/HR roles
Department Summaries	View department-level operational summaries and trends.	Authorised management/HR roles
Device Monitoring	Review security/device violations, weekly device sharing and runtime controls.	Admin and IT admin
Staff Management / Activation	Manage staff profiles, activation and account administration.	Admin and IT admin
Settings & Profile	Update personal details where permitted, password, preferences and security options.	All staff; some fields admin-only

QCC ELECTRONIC ATTENDANCE SYSTEM

New Staff Training Guide

Overview of modules, responsibilities and common workflows

Overview of modules, responsibilities and common workflows

Prepared for onboarding and practical orientation. Access to modules and actions is controlled by each user's assigned role, department and location.

1. Quick Start for New Staff

- Sign in with your approved account and confirm that your name, department, location and role are correct on Profile Settings.
- Use the left sidebar to open only the modules assigned to your role. If a tab appears incorrectly or a required tab is missing, report it to an administrator.
- Complete your profile and security settings, then review notifications and assigned tasks.
- Always sign out when using a shared or public computer. Never share your password.

2. Main Application Modules

3. Role-Based Access Principles

- Staff users normally see personal modules: Home Dashboard, E-Circulars, Attendance Check, Excuse Duty, Leave and Loan submission/tracking.
- Department Heads may review requests assigned to them. For non-regional staff, they may view department requests across locations but may endorse/approve only requests from their own assigned non-regional location.
- Regional HR, Regional Managers, HR executives, Accounts, Loan Office, HR Records and other specialist roles receive additional tabs only where their role requires them.
- Administrators and IT administrators manage configuration, staff accounts, locations, monitoring and broad reporting.
- A department name alone must not grant specialist permissions. The assigned role, department and location must agree with the action being performed.

4. Common Workflows

Leave

Staff submits a leave request/plan.

Assigned HOD or authorised reviewer reviews and endorses/approves within the permitted scope.

HR Leave Office adjusts or processes the request where applicable.

HR Executive/authorised approver completes the next approval stage.

HR Records adds the official reference and unlocks the memo where required.

Loan

Staff submits a loan request.

The assigned HOD reviews the request within the permitted department/location scope.

Loan/Accounts Office performs financial or FD processing where applicable.

Accounts Executive or other authorised approver reviews the assigned approval stage.

Disbursement Confirmation is completed after all required approvals.

Attendance

Open Attendance Check at the start/end of duty as instructed.

Confirm the displayed date, time and location before submitting.

Review attendance history for missing or incorrect records.

Report discrepancies through the approved administrative channel; do not create duplicate submissions.

Transport

Submit a transport request with complete purpose, date, passengers and location details.

Track the request under My Approvals/Requests when assigned.

Drivers and authorised transport officers maintain vehicle/driver records and action requests according to role.

5. Good Practice and Troubleshooting

- Use clear, accurate information and attach supporting documents only when requested.
- Do not approve your own request or act outside your assigned role, department or location.
- If a red permission message appears, stop and report the module, user role, request number and screenshot to the system administrator.
- If a module opens the wrong page, refresh once, confirm the URL, then report the issue with the affected sidebar item.
- Refresh after an approval action and confirm the request status changed before taking another action.
- Keep personal and staff information confidential.

6. Training Checklist

- Sign in and verify profile information
- Open Home Dashboard and navigate the sidebar
- Complete a practice attendance action
- Locate leave balance and submit/view a practice leave request
- Open Loan Administration and identify personal versus review tabs
- Read role-specific approval responsibilities
- Open Settings, change password and review security options
- Sign out securely

Important: The system is role-controlled. New staff should only use the tabs and actions visible for their approved role. Any unexpected access should be reported immediately for correction.
